best total conversion ever.. This might be the last hope for Ark.. It would interesting to be able to play on a public server that is not infested with Stone pillars, campfires, and other odd junk that prevents almost anything from getting done. But then again this goes for ANY of the public servers.. great game highly recommended but for some reason the servers and the game is so lags you can't even move when you're in the game pls fix the lag!!!!. I love this mod. In fact everything about it. Keeps you busy that's for sure. My only complaint is there is no poultry nor fat and maybe 1 or 2 other things. But why all the negative reviews? It loads and it does work! If you load it up and wait 10 mins it will work :D We on my friend's server have a blast!! Butttt please fix the poultry and fat. .. one word.awesome
